

The American Recovery and Reinvestment Act

On Tuesday, February 17, 2009, President Barack Obama signed the economic stimulus bill into law. The table below highlights those areas of education slated to receive funds. Note that all the funding allocations on this page flow through already authorized programs, such as Title I and IDEA, and will use the same allocation mechanisms and regulations already in place.

Federal Stimulus Dollars

FACTS, FIGURES, AND HOW MDR CAN HELP

State Fiscal Stabilization Fund

Total Allocation **\$53.6 billion**

Purpose: To provide the amount of funds, through the state's primary elementary and secondary funding formulae, that is needed to restore, in each of fiscal years 2009, 2010, and 2011, the level of state support provided through such formulae to the greater of the fiscal year 2008 or fiscal year 2009 level.

Allocated as follows:

Elementary, Secondary, and Postsecondary Ed **\$39.5 billion**

These grants will be made by the Secretary of Education to the Governors, who are to allocate 61% on the basis of their relative population of individuals aged 5 through 24 and 39% on the basis of their relative total population.

Public Safety and Other Services **\$8.8 billion**

May include assistance for K-12 and public institutions of higher education and for modernization, renovation, or repair of public school facilities and institutions of higher education facilities, including activities consistent with a recognized green building rating system.

In general, local education agencies may use these funds for any activity authorized by ESEA, IDEA, the Adult and Family Literacy Act, or the Carl D. Perkins Career and Technical Education Act of 2006 or for modernization, renovation, or repair of school facilities.

State Incentive Grants **\$4.35 billion**

This money is reserved for use by the Secretary of Education to reward states that have made significant progress in ensuring that students continue making progress toward meeting the state's student academic achievement standards, improving graduation rates, and achieving equity in teacher distribution.

Innovation Fund **\$650 million**

This money is reserved for use by the Secretary of Education to reward states that have made significant gains in closing the achievement gap. The award-winning entities may use the funds to expand their work and serve as models for best practice, to allow them to work in partnership with the private sector and philanthropic community, and to identify and document best practice that can be shared and taken to scale based on demonstrated success.
